Announcement

We desire to announce that we have leased the Baldwin Sanatorium, and will continue to conduct the institution for the treatment of tuberculosis only. It shall be our endeavor to make it as good as the best, and to that end we ask the cooperation of the citizens of El Paso.

Respectfully,

R. B. HOMAN, M. D.
M. C. McKINNEY.

THE HABERDASHERS

MANY GOATS AT EL PASO FAIR THIS YEAR

Not the Butinski Kind on Two Legs, But Real Angoras.

Goats, goatlets and goatesses will gather from all parts of the southwest for the El Paso Fair and exposition. And they will be the real thing, the fine haired folks whose winter coat furnishes one of the great wealth producing commodities of the section.

The National Mohair Growers' association will hold its national convention in El Paso from October 29 to November 6 during the El Paso fair. Representing the owners of thousands of goats now grazing in the southwest, the association will have an exhibit in the livestock department of the fair.

In addition to the livestock display of the association, a manufacturers' exhibit will also be made. L. O. Baker, of Silver City, secretary of the National association, is now in Boston and other wool centers, arranging with the manufacturers of mohair products to make extensive displays at the fair and to offer prizes for the best exhibits made by the mohair growers in the section.

AGRICULTURAL CONDITIONS SURPASS MINING DEPOSITS

This Report Will Be Made by Expert Investigating Mexican Conditions for North Western Railway.

Chihuahua, Mexico, July 9.—It is well known that the Mexico North Western railway company has had M. C. Liguorik, an expert hydraulic engineer, out for over a year studying the irrigation and agricultural possibilities of the country tributary to its lines of railroad already built and being constructed in this state. Mr. Liguorik, while here this week, stated that he would finish his studies and report to his company within the next two or three months.

His investigations cover a large territory on both sides of the company's roads from the border at El Paso and Juarez down to Minaca and to this city. He made a trip over the country from Monclova in the state of Coahuila to the city of Chihuahua when the Mexican North Western interests were investigating the possibilities of that projected line of railroad. He has also investigated conditions in Sonora.

Although his report will be private, Mr. Liguorik states that the agricultural possibilities of the three states, Coahuila, Chihuahua and Sonora far surpass their mining possibilities.

WESTERN UNION EXERCISES SUPERVISION OF MESSAGES

New York, N. Y., July 9.—As suddenly as the wire service to various broker offices in New York state cities were suspended Thursday, so suddenly was it resumed again in many of them today, with no more explanation by the Western Union Telegraph company for the second change than for the first.

Wall street, although without official data to go on, considers the attitude of the Western Union toward its customers as highly important. The street has long held that the telegraph companies ought to exercise the same supervision over their customers as the telephone companies exercise over the business they accept for their advertising columns. If, as would seem it is now, the policy of the Western Union to exercise such supervision, established by brokers and bankers believe it will result in protection for the investing public and in a greater volume of orders for the bona fide stock exchanges of the country.

Senator Platt and Gov. Fort On Osteopathy

(From New York Life). History Repents Itself. Governor Fort, in refusing to help the New Jersey Medical society drive out the osteopaths, said to one of the doctors: "The gentleman who has just spoken has himself told me that he has had patients whom he sent to osteopaths for treatment. His own wife is one of them. I am another. What I had a broken rib last year Dr. Schauffert himself advised me to consult an osteopath."

This recalls senator Platt's reply to the New York doctors when his aid was implored to prevent the osteopaths from practicing in this state: "Why, gentlemen, as osteopathy cured me when everything else failed and I still depend on it, I might seem ungrateful if I drove them out of business."

HEAVY RAINS FILL SURFACE WATER TANKS AT VALENTINE

Mrs. R. B. Jones resigns postmaster-ship; New York Man Taking Position; Personal News Notes.

Valentine, Texas, July 8.—The rains have filled the surface tanks near town to capacity and the entire valley is green. C. O. Finley reports good rains on his ranch.

Mrs. R. B. Jones, postmaster, has resigned and accepted a position with the Valentine Drug company. Her place in the postoffice is filled by Mr. Schorbach of New York.

Miss Ophie Parker, who has been teaching on the D. Knight ranch, is visiting her sister, Mrs. Barton Parker.

Mrs. P. M. Smith is visiting at the ranch home of her daughter, Mrs. Van Neal.

Mrs. W. Baskin and daughter, Fay, who have been visiting Mr. and Mrs. W. W. Gravenburg, have returned to their home at Houston.

Miss Maude Wood, who has been visiting at the Smith home, has returned to Sanderson.

Misses Jessie and Ruth Jones of the Kelly ranch are guests of Mrs. Lou Foley.

AIRSHIP TREATY WITH MEXICO ABOUT FINISHED

Washington, D. C., July 9.—The proposal to transport freight by airship from Arizona to Mexico probably will have the effect of bringing the United States and Mexico into an early agreement in regard to the first aerial treaty. The Mexican government has approved in a general way the original draft of the treaty, which ambassador De La Barra suggested to secretary Knox. The approval of the various departments of the Mexican government to the details of the treaty is all that delays the formal presentation of that document to the American state department.

The treaty will provide, it is said, for the registration of airships by each country. In this manner it would be sought to require the airships to land at the boundary to comply with the customs, immigration and health laws of the country about to be entered. Europe is manifesting a keen interest in the preparation of the treaty.

Pay your gas bill before the 15th and save the discount

Trace the Heat In Your House

Doesn't most of it come from the kitchen, from that coal stove that must be lighted three times a day?

Why don't you instal a gas range? Then, you'll have a cool kitchen and a cool house.

Gas ranges are constructed on economical principles—to do most with least. A foot above the flame of a gas range there is no heat—why should there be? The heat is all concentrated at the burner, where the pan goes. There's none given off into the air.

This is why a gas range means a comfortable kitchen and a comfortable house.

Don't delay any longer—instal a gas range now. Come to our show rooms the first thing Monday morning and see the different kinds of gas ranges. Or, telephone for a solicitor to call and tell you about them.
